Application

- * Extend your Ethernet connection up to 0~120km away using fiber optics
- *Creates an economical Ethernet-fiber/copper-fiber link for connecting remote sub-networks to larger fiber optic networks/backbones
- *Converts Ethernet to fiber, fiber to copper/Ethernet, ensuring optimum network scalability for connecting two or more Ethernet network nodes (e.g. connecting two buildings on the same campus)
- *Designed to provide high-speed bandwidth for demanding large scale work groups that require expansion of Gigabit Ethernet Network
